Initial Large Animal Alignment	Full Exam of the spine and joints.	1	\$120.00	\$120.00

The spine is a complex framework of bones (vertebra), ligaments, muscles and nerves. If the movement and biomechanics of the vertebra become dysfunctional, they can interfere with the performance of the nerves that branch off of the spinal cord and go to the the muscles and organs. Your animal can lose normal mobility; resulting in stiffness, pain and even organ dysfunction, which ultimately will impact your animal's entire well being and quality of life.
